Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This action is in response to Paper No. 7 dated January 7, 2003 wherein applicants' amendments to claims 1 and 16 and page 7 of the instant specification has been entered of record. The pending claims of record are claims 1-16.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The amendments to claims 1 and 16 are indefinite and confusing because the end point of each grouping for the amino content overlaps one another and therefore is unclear how the component when both end points are the same. The said claims are further confusing because it is unclear as to when one is to select the ranges of component to achieve the amino content. Also, the claims are further confusing when one views the independent claim 1 with respect to the dependent claims and their amino content. Claim 16 is further confusing when read in light of the condition for (a) with (d) or (e) or (f) because the relative proportion for the monomeric or the oligomeric in (a) has not been established.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 1714

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-16 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Wu et al (Wu 5,593,735) for reasons made of record in Paper No. 6 dated October 24, 2002.

Applicant's arguments filed January 7, 2003 have been fully considered but they are not persuasive.

The previous rejection under 35 U.S.C. 112 second paragraph is withdrawn in view of the rejection set forth above and applicants' amendment to claim 16.

Contrary to applicants' arguments that the phrase "consisting essentially" in the amended claims would overcome the teachings of Wu, especially to exclude the carbamate co-crosslinking agent in the acid cured coating composition, the instant claims of record are not directed to a coating

Art Unit: 1714

composition and the said phrase would not exclude the said carbamate-crosslinking agent.

In support of their arguments applicants state that Table 3 of the instant application shows unexpectedly high MEK rub numbers (solvent resistance) and Knoop Hardness indexes (hardness) over comparative example 12, 14, 15. However, applicant has not established on record that the comparative examples 12, 14 and 15 are those of Wu et al that is considered to be the closest prior art or record that has been relied on in the rejection of record made by the examiner. It appears that applicants have not fully considered the amino resin crosslinking agents of Wu et al wherein its teachings have been set forth on page 3 of Paper No. 6 dated October 24, 2002. Applicants' claims are written so broadly that they overlap the teachings of Wu et al.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1714

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
